REGULAFLOW®

Pressureless Flow Regulation

PRESSURELESS FLOW REGULATION

RegulaFlow® is the best for :

- **Shrinkmachine emptying**
- **Buffer**
- **Flow regulation**

Products on RegulaFlow® :

- **Packs (bottles, cans..)**
- **Flow Pack**
- **Boxes**
- **Tissues, wipes**
- ...

Single lane

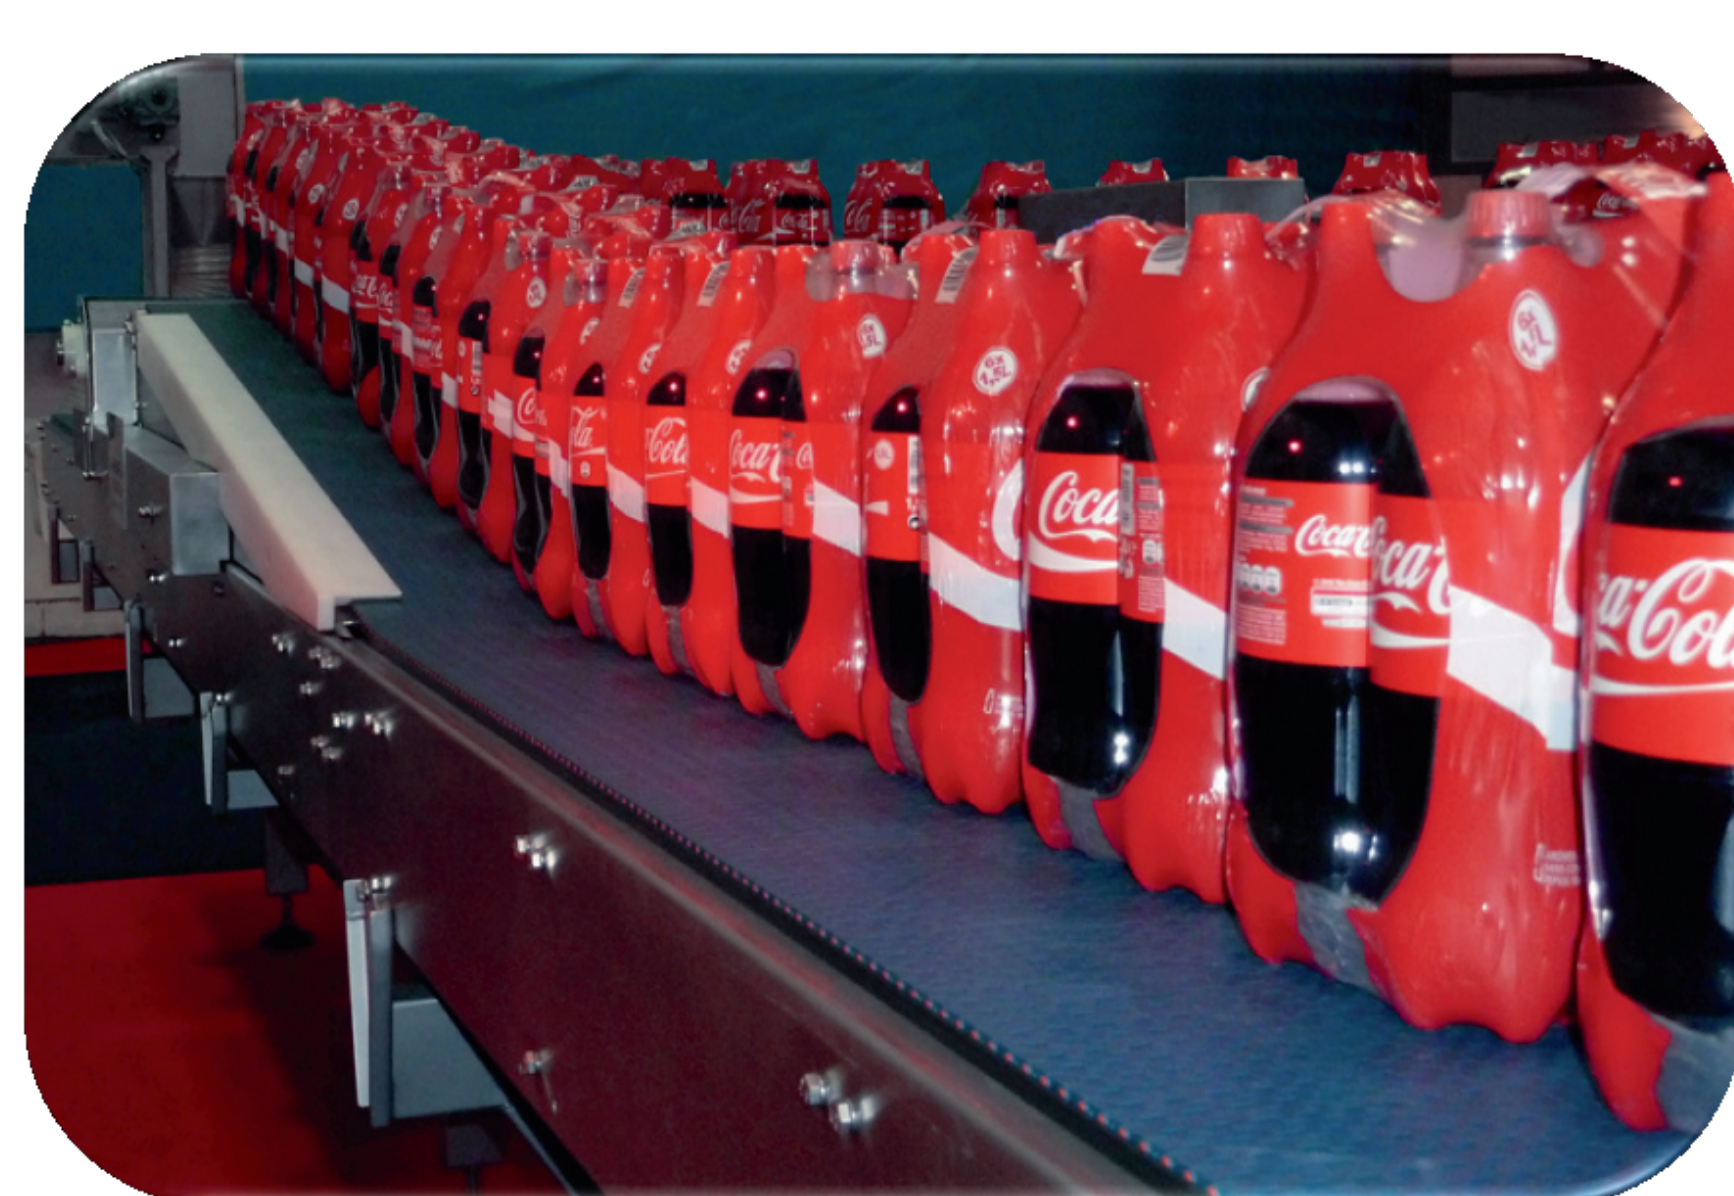

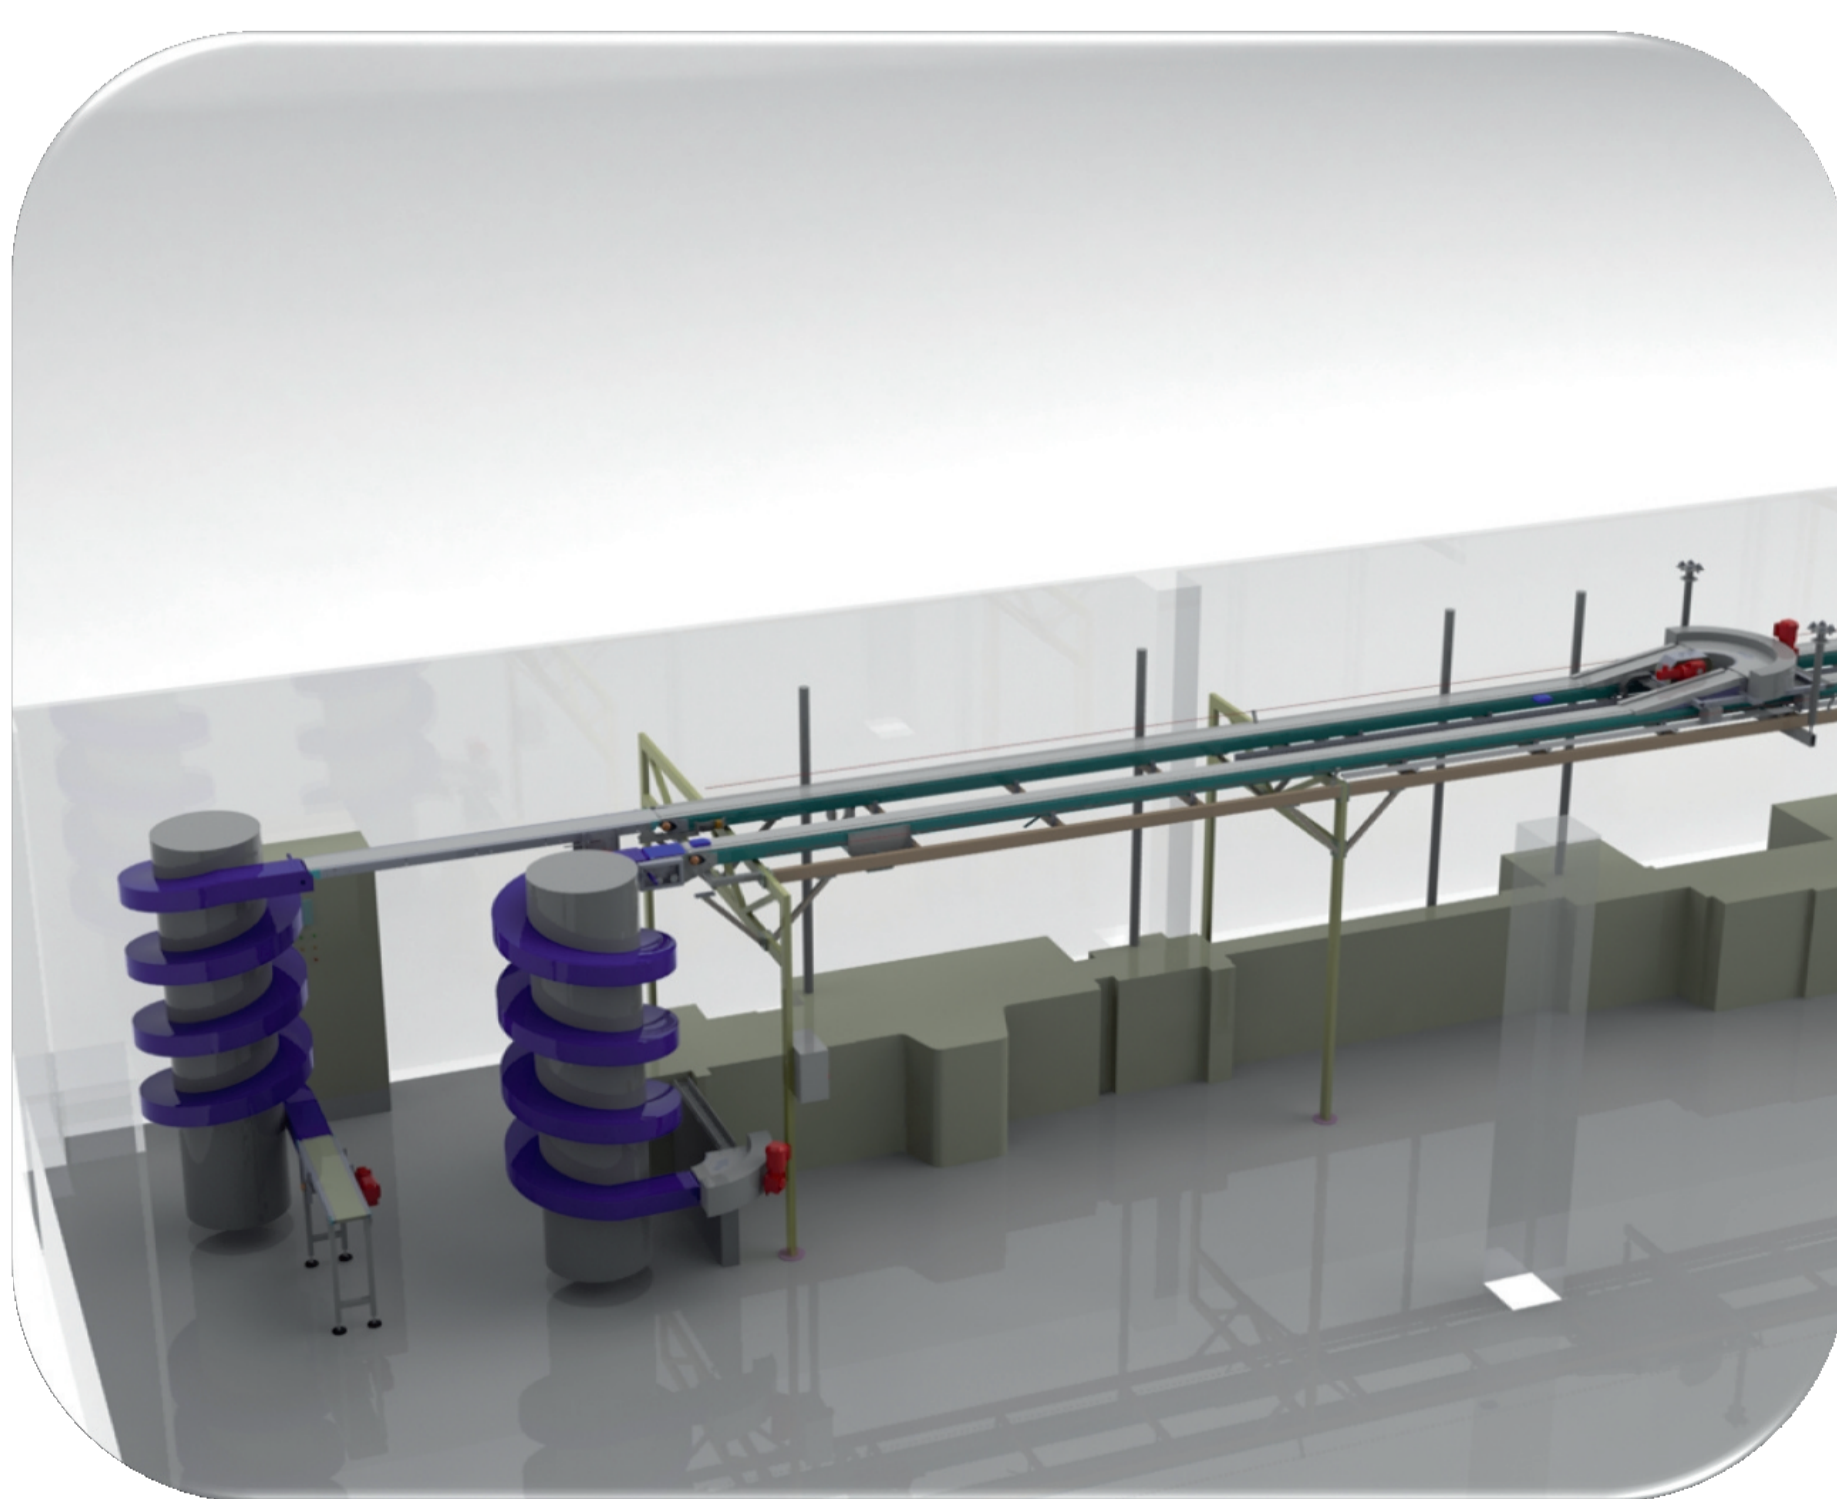

OR

Multi-lane

- **No guides** (neither side guides nor central, neither fixe nor adjustable).
- Respect of the products (better quality): **no friction of the packs** on the conveyor (bottom and sides).
- No guides to create or to modify for any new pack.
- **No time** lost with format **change adjustments**
- Speed at least halved.
- Shortest way (no passage on all classical accumulation conveyors).

- **Space saving**: twice shorter.
- Much less maintenance.
- Perfect positive transfer: no dead plate.
- Ergonomic for operators: no supports for guides, open view and easy access to the line.
- Minimum noise : 62 dB when working with packs - a revolution and evolution compared with rollers and LBP conveyors.
- Eco-energy: half the consumption of a standard installation (saving more than 5kW)
- **Better price** than a standard accumulation system with adjustable guides
